BUSINESS & TECHNOLOGY LEADER

with 26 years of C-level leadership experience and a proven track record of delivering results

CAREER PROFILE

I'm a business leader and technologist who enjoys turning complex problems into useful products. After serving as President of Younique, I returned my focus to Dezota, the company I founded, to lead its next chapter in consumer financial technology. I'm building WealthProof to help people better understand their investments and make more informed financial decisions.

I sold my first software application at age 14 and have spent my career connecting technology with business strategy. My experience spans software development, global financial systems modernization, and executive leadership—from venture-backed startups to global companies with hundreds of millions in annual revenue. I bring technologists and business stakeholders together to build products around the people who use them.

I led the architecture and development of two successful commercial SaaS platforms in online courseware and photography and hold several related U.S. patents. I also co-authored Instant JavaScript, an early book on the language published by Prentice Hall.

I hold a BS in Computer Science from Brigham Young University and an MBA from its Marriott School of Management. Utah Business recognized me as one of Utah's Top 40 Business Leaders Under 40.

Core areas of leadership expertise include:

- Business Strategy & Execution
- Product Vision & Roadmaps
- SaaS Product Commercialization
- Cross-Functional Leadership
- Venture Capital Fundraising
- P&L Management
- AI Adoption & Product Strategy
- M&A Integration
- Vendor & Contract Negotiation
- Financial Systems Modernization
- Agile Product Delivery
- Organizational Design & Change
- Global Team Leadership
- Consumer Fintech & E-commerce
- Data-Informed Decision Making
- International Expansion

Core areas of technical expertise include:

- AI-Assisted Software Development
- LLM Integration & RAG
- Private AI Deployment (Ollama)
- TypeScript, JavaScript & Node.js
- React & API Design (GraphQL)
- Data Modeling & PostgreSQL
- Scalable SaaS Architecture
- Python & Java
- Cloud (AWS) & Linux Systems
- Virtualization (Proxmox, VMware)
- Distributed Storage (Ceph)
- Monitoring (Grafana, Zabbix)
- High Availability & Recovery
- Containers (Docker, Kubernetes)
- CI/CD & Release Automation
- Application Security & Access Control
- Financial Data Integration & Quality
- Search & Vector Retrieval
- Analytics & Geospatial Systems

PROFESSIONAL EXPERIENCE

DEZOTA LLC — DECEMBER 2025 – PRESENT

FOUNDER & CEO

Leading Dezota's next chapter in consumer financial technology as we build WealthProof, a next-generation platform for consumer financial empowerment.

As founder and architect of the WealthProof platform, I lead product strategy and research as we prepare for launch. Our focus is helping people understand their investments, explore the evidence behind the numbers, and make more informed decisions.

This work builds on Dezota's consulting history and years of independent research and development, bringing together my experience in executive leadership, global financial systems modernization, and designing technology around the people who use it.

YOUNIQUE LLC — MAY 2022 – NOVEMBER 2025

PRESIDENT, FORMERLY CHIEF TECHNOLOGY OFFICER

Younique is a global direct sales company focused on cosmetics, skin care, and wellness products, with operations in 22 countries, hundreds of millions in annual revenue, and tens of thousands of independent sellers.

Led the transformation of Younique's legacy e-commerce and salesforce tools to a modern, internally developed mobile-first platform. Asked by the founder and CEO to serve as President and oversee all day-to-day operations. Restructured the leadership team and made a key marketing hire. Streamlined product development, revamped the global commission plan, and introduced agile principles across the corporate workforce. Exited unprofitable markets, aligned budgets with key priorities, and streamlined legacy business processes.

AEON AI, INC. — FEBRUARY 2021 – MAY 2022

CHIEF PRODUCT OFFICER

Aeon AI is disrupting the real-estate market with a cloud-based platform to help guide large-scale property development decisions through analysis and forecasting for land developers and government entities.

Advanced the MVP into a geospatial data science platform using open-source technologies including Apache Superset, Carto, and Dremio. Partnered with cities, states, and metropolitan planning organizations to model growth and land use. Trained and mentored data science staff. Personally implemented a geospatial extension to Dremio in Java to support 76 industry-standard geometry SQL functions and 21 H3 index functions based on Uber's Hexagonal Spatial Index. Created a custom Docker build of CartoDB with extended geospatial statistical analysis. Created processes to normalize Census ACS datasets for use in the data analysis platform.

TEKSYSTEMS, INC. — JANUARY 2019 – FEBRUARY 2021

CONSULTANT/AGILE BUSINESS ANALYST

Consulted as principal analyst on a modernization project for the *Finance & Records Division* of the *Church of Jesus Christ of Latter-day Saints*. The system integrated with local banks, complied with banking and tax regulations, and supported tens of thousands of child entities in over 200 countries with millions of end-users. Reverse-engineered business rules from a legacy system with nearly three million lines of code and 400 database tables. Developed functional requirements, SQL queries, and interactive user interface prototypes to support business stakeholders, software engineers, and QA engineers. Developed prototypes in Figma to support a modern React/GraphQL architecture. Worked with Azure DevOps and Jama. Served as Scrum Product Owner in partnership with subject-matter experts. The project was a year behind the business goals when I joined. Development velocity increased significantly and defects decreased significantly during my time on the project.

DEZOTA, LLC. – PROVO, UTAH — MAY 2018 – JANUARY 2019

Dezota is a consulting practice focused on helping businesses uncover and act on insights in their data. Services include data transformation, data analysis, decision dashboards, and general business advice.

PRINCIPAL CONSULTANT

Built a ready-to-use data dashboard solution for companies that made it easier to combine, analyze, and report on data without maintaining a separate data warehouse. Connected the system with common business databases and helped clients use their data to understand product mix, customer behavior, salesforce performance, and other key business measures. Also advised clients on software rollouts, international growth, and online training strategies.

CTMH, INC. – PLEASANT GROVE, UTAH AUGUST 2007 – MAY 2018

For nearly three decades, a leading direct sales company serving the craft and hobby industry in the U.S., Canada, Australia, and New Zealand, with 100 employees and thousands of independent distributors. Operated under the Close To My Heart and Studio J® brands.

CHIEF OPERATING OFFICER, FORMERLY CHIEF INFORMATION OFFICER

Served as lead architect of the patented Studio J® Online Photo Collage Platform. Designed Studio J as a scalable cloud platform supporting high-volume usage. Transformed the information technology team into a center of excellence using agile development best practices. Transformed the distribution center from a labor-intensive paper-based system to a high-volume electronic picking and shipping platform. Trained thousands of independent distributors at conventions and regional events. Oversaw information technology, finance and accounting, human resources, legal, and operations (including manufacturing, distribution, and sourcing). Led a 2013 expansion into Australasia that yielded over 30% growth for the company.

POINTECAST CORPORATION – LINDON, UTAH NOVEMBER 2003 – AUGUST 2007

A leading global provider of rapid online training software and services

PRESIDENT AND CHIEF EXECUTIVE OFFICER, MEMBER OF THE BOARD OF DIRECTORS

Founded the company in November 2003 as a spinout from Geolux. Secured multimillion-dollar venture capital funding. Combined internal R&D with technology acquisitions to develop products. Architected PointeCast's learning management system to manage, deliver, and track SCORM-compliant online multimedia training. Acquired a key technology component from Cisco Systems for our PowerPoint-based e-learning authoring tool. The company received a U.S. patent on adaptive e-learning. Formally launched the product in 2005. Served over 1,000 customers worldwide, including ConEdison, Dupont, General Electric, Halliburton, NuSkin, Pitney Bowes, and the U.S. Military. Achieved average year-over-year revenue growth of 293% during the final three years as an independent company. Generated over 40% of revenue from recurring subscriptions. Used a low-touch online sales and marketing model and developed channel partnerships. The company was acquired in June 2007 by Helius, a Hughes company, in a private transaction valuing it at over seven times revenue.

GEOLUX COMMUNICATIONS, INC. – LINDON, UTAH APRIL 2002 – NOVEMBER 2003

A publisher of hard-skills online multimedia training, tools, and assessments for the industrial, medical, and education industries.

VICE PRESIDENT AND CHIEF TECHNOLOGY OFFICER, GENERAL MANAGER OF LEARNINGOPTICS SUBSIDIARY

Geolux was founded in December 2001 by combining three independent companies serving distinct markets. Developed advanced multimedia content for the subsidiaries. Created a consolidated technology platform for e-learning content authoring, delivery, and management to serve all subsidiaries. The content and platform supported advanced industrial training for companies such as Ford and Boeing. Began piloting the platform with outside customers through the LearningOptics subsidiary. Negotiated the spinout of LearningOptics as an independent company that was later renamed PointeCast.

WEBMILES, INC. – SANDY, UTAH MAY 2000 – APRIL 2002

Creator of a universal airline miles loyalty rewards program that let members earn miles through partners including Kroger, Avis Car Rental, Wyndham Hotels, the WebMiles Credit Card, and online retailers. Received $40 million in venture capital funding.

VICE PRESIDENT AND CHIEF INFORMATION OFFICER

Developed a scalable loyalty rewards management platform and online application handling millions of consumer transactions from hundreds of partners. Features included customer and partner self-service, online affiliate integration, data analytics, and email marketing.

NOVELL, INC. – PROVO, UTAH & SAN JOSE, CALIFORNIA — OCTOBER 1996 – MAY 2000

At the time, Novell was one of the largest and oldest independent software companies, with annual revenue of approximately $1 billion. Its products included the NetWare network operating system and Novell Directory Services identity management system.

WEB SYSTEMS ARCHITECT, GLOBAL TECHNICAL ARCHITECTURE GROUP, INFORMATION TECHNOLOGY
WEBMASTER, ELECTRONIC MARKETING

Migrated Novell's corporate web infrastructure from a monolithic system to a redundant n-tier architecture supporting millions of hits per day. Architected the deployment of Novell's direct-sales online store and deployed mission-critical web systems on pre-release Novell software. Partnered with software engineering teams to enable Novell's operating system, directory, and application server to support enterprise web applications. Transformed Novell's intranet from static pages into a business system supporting the daily work of its global workforce. The intranet received the 1999 CIO WebBusiness 50/50 Award, recognizing it as one of the top 50 corporate intranets.

BRIGHAM YOUNG UNIVERSITY – PROVO, UTAH — APRIL 1993 – OCTOBER 1996

Brigham Young University in Provo is the flagship university of the Church of Jesus Christ of Latter-day Saints. The Harold B. Lee Library served campus faculty, staff, and approximately 28,000 students.

PROGRAMMER/ANALYST, LIBRARY INFORMATION SYSTEMS, HAROLD B. LEE LIBRARY

Developed an early online document delivery system using the Gopher protocol. Built one of the first web-based library collection prototypes by connecting a UNIX-based CGI application to an IBM mainframe through the Z39.50 protocol. Created the library's first website in January 1994 and trained librarians to use web technology, including online preservation and access to special collections. Developed a data-processing engine for Library of Congress MARC records and an open-source API connecting Informix 4GL database applications to the web.

EDUCATION

BACHELOR OF SCIENCE, COMPUTER SCIENCE
BRIGHAM YOUNG UNIVERSITY, PROVO, UTAH

MASTER OF BUSINESS ADMINISTRATION
MARRIOTT SCHOOL OF MANAGEMENT
BRIGHAM YOUNG UNIVERSITY, PROVO, UTAH

PUBLICATIONS

Author, *Instant JavaScript*
Co-authored with William Lund, published by Prentice Hall's PTR Division, © 1997, 400 pages

Instant JavaScript taught web application developers to combine client-side JavaScript, server-side JavaScript, and Java to create dynamic and interactive database-driven web applications. It was the first book to cover Netscape's server-side JavaScript technology in depth. Today, Node.js builds on that early approach to server-side JavaScript as a platform for Internet-scale applications.
